

BIP has a local connection to a previously unstored standing bounding family

Critical stored-section coordinates: $u = -0.0206915832$, $y = 0.9690897844$, pitch rate = 0.1307591266, $T = 2.9822281155$

A Entire stored BIP continuation

B Standing family and the two traveling daughters

Native branch-point and full-state Floquet checks support this local connection; the full standing-parent branch has not been continued. The standing parent is newly constructed; no connection to the other supplied PIP, PK, or B2 branches is established.
